IN THE SPECIFICATION

Page 3, line 2,

change "provide a" to --provide a data apparatus for common use in a DVD/CD player using discrimination information provided according to a DVD or a CD. The data processor apparatus includes a signal pre-processor generating a clock from a pulse stream read from a disk and performing demodulation according to the discrimination information, a memory storing data processed by the signal pre-processor in a corresponding format according to the mode discrimination information, and a data processor error-correcting the data stored in the
